

Idea and Concept:

"14 x 14" – Survey of the Danube Region

14 individual views – 14 artists – 14 countries of the Danube Region

"14 x 14" – is the outcome of ten successful years of documenta featuring ten Danube countries. It is also the future of the project including four new states of the Danube macro region: Slovenia, Bosnia-Herzegovina, Montenegro and the Czech Republic are marking an interesting transition. We want to grab a hold on the completion of the first phase of art representation in Regensburg, the most northern point of the Danube, and the beginning of a new phase of cultural exchange between people living in the Danube region.

"14 x 14" – participating artists of the 14 Danube countries were invited to explore their country, their society and the living circumstances of their fellow citizens 2012 by the means of photography. Two photographs per artist are supposed to make their individual view apparent and will give the viewer a chance to discover a new approach to that particular part of Europe. The very special was that only one of the participating artists is professional photographer. So we got a real personal view. The documenta photo exhibition "**14x14 – Individual Views. – Positions in photography.**" will travel through the Danube countries throughout the next years. Essential part of our concept is to give an extra view and focus on the works of the participating artist of your country this means on Alexandra Croitoru's work and on the work of another local artist.

This means extra presentation of two artists in the frame of the documenta photo exhibit. For sure everything can and should be discussed.
